

Intensive Course on Medications for Commonly Seen Musculoskeletal Disorders and Pain Management

【 Program Objectives 】

- Understand the indications and contraindications of commonly prescribed medications for Musculoskeletal Disorders
- Know the adverse effects of commonly prescribed medications for Musculoskeletal Disorders
- Know the practical tips when answering patients' enquiries on medications for Musculoskeletal Disorders

Introduction:

This is a comprehensive and practical clinical pharmacology course with emphasis on the practical tips when answering patients' enquiries on medications for Musculoskeletal Disorders, with a focus on analgesics. Issues on drug-drug interactions, methods to enhance drug compliance and common misconceptions on drugs will be discussed during the course in an interactive manner. Those aspects are rarely mentioned in standard textbooks. Detailed lecture notes (mainly in English, supplemented with Chinese) will be distributed in the course. References for journal articles will be provided. Nurses or any health professionals can benefit greatly from this course.
