Paediatric Rehabilitation

is an active and comprehensive program for treating children with autistic spectrum disorder (ASD), Attention Deficit Hyperactivity Disorder (ADHD), cerebral palsy, epilepsy, mental retardation, hearing impairment, or developmental delay.

Our paediatric rehabilitation course provides comprehensive and all-rounded practical training, including medical, physiotherapy, occupational therapy, speech therapy, and audiology services. We intend to train up frontline healthcare professionals to be more competent in delivering evidence-based and practical paediatric rehabilitation services. We focus on improving patients' functional limitations consequent to certain chronic diseases.

This paediatric rehabilitation program is one of our seven rehabilitation modules, namely neurological rehabilitation, musculoskeletal rehabilitation, cardiopulmonary rehabilitation, paediatric rehabilitation, geriatric rehabilitation, sports rehabilitation and mental rehabilitation. Each module consists of seven sessions and each session lasts for three hours. The entire rehabilitation medicine certificate course thus lasts for (21 hours x 7) 147 hours.

Topics

- Epidemiology, clinical features and treatments of commonly seen paediatric diseases in Hong Kong Medical Doctor (4.5 hrs)
- Paediatric musculoskeletal physiotherapy
- Childhood Obesity Management Physiotherapist (6 hrs)
- Paediatric neuro-physiotherapy
- Paediatric and adolescent sports injuries
- Evidence-based paediatric rehabilitation
- Rethinking OT assessment approaches and intervention strategies for children with i) dyslexia and DCD, and ii) ASD Occupational Therapist (6 hrs)
- Creating interesting OT training activities for children with i) fine-motor problems, and ii) attention deficits
- Approach to children with hearing impairment Audiologist (1.5 hrs)
- Management of paediatric communication disorders Speech Therapist (3 hrs)
- Exam 15 min

Rehabilitation Medicine Certificate Course

- 1) Taught by different well experienced health professionals (eg. medical doctors, physiotherapists, occupational therapists, speech therapists, psychologists; etc). Transdisciplinary health care approach will be emphasized.
- 2) Nurses will be awarded CNE points.
- 3) CPD points for physiotherapists, occupational therapists, and speech therapists are pending.
- 4) Theoretical and practical components are both included. There will be discussions on case studies and practical workshops in each module.
- 5) Detailed lecture notes (mainly in English) will be distributed.
- 6) Participants can choose to attend any one of the modules or all modules.
- 7) Participants who finish all seven modules and pass all the examinations will be issued an "Advanced Certificate in Rehabilitation Professionals".
